We
Grow!

An engaging and interactive mini-exhibition about agriculture for family audiences. Available to book from Port Discovery Children's Museum. Select A, B, C, or any combination to fit your space!

Description:

Here We Grow!, Port Discovery's own agricultural mini-exhibition, introduces children and families to the processes, products, and people who work on farms. Here We Grow! explores farming through themes of science and technology, history, local ecology, global economics, and art. Interactive exhibit components will immerse children and students into the world of farming! Additional add-on educational programming is available.

Configurations and component descriptions

1

Endoscope:

Slide the endoscope to examine the insides of a horse's body to find out if the horse needs medical attention.

2

Case Files & Radiograph:

Using Dr. Rachel's case files and X-rays help children, parents, and educators can help to diagnose the sick horses' ailments.

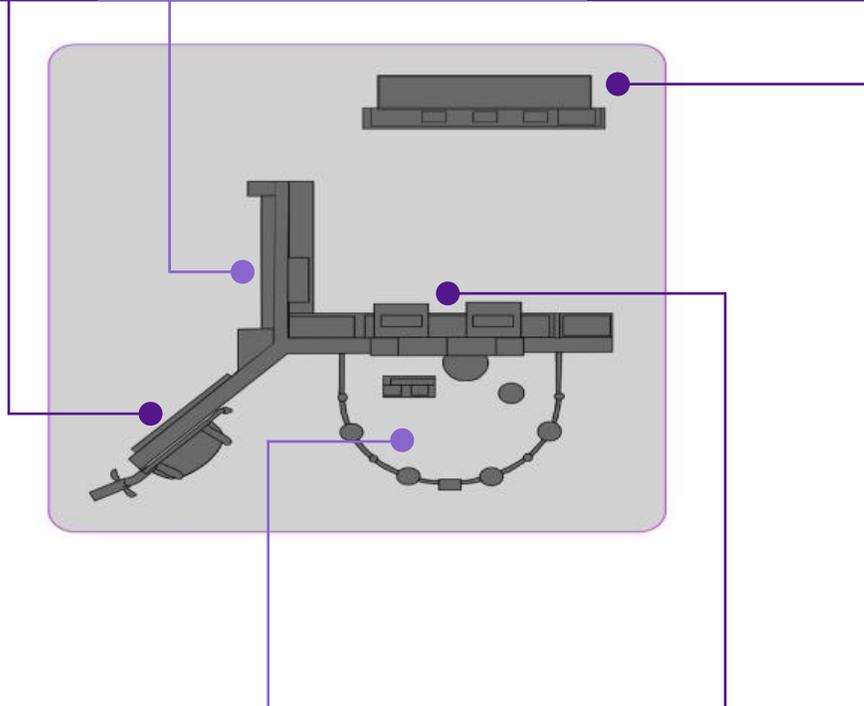

3

Global Exchange:

Place different colored balls into one of the many global exchange tubes, to watch the air "ship" the ball from Maryland all over the world.

The mini-exhibition's modular design allows for flexible configurations and layouts:

4

Can you beat the milking machine?

Pick a station and get ready!

5

Art & Culture:

Children, parents, and educators can learn how to separate good eggs from bad using their different senses.
