In Tot Trails, I can play here!

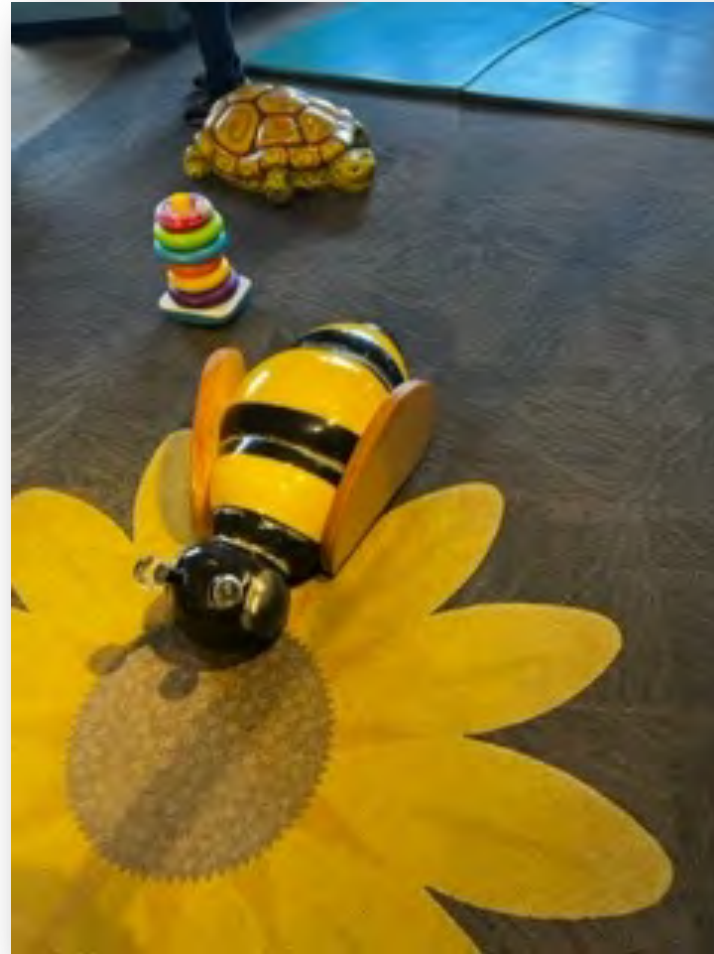

There are different things to see and do.

In Tot Trails, I can crawl on the floor.

I can lay on the bumble bee or the turtle. The bumble bee vibrates.

I can make music. I can play with scarves. I can have fun.

I can listen to stories. Sometimes, listening to stories can be fun.

Tot Trails has sand. I can play with the sand.

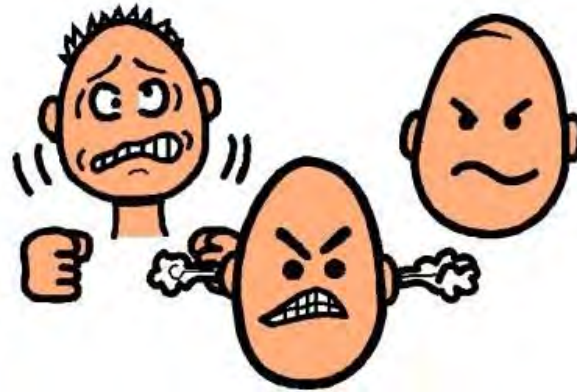

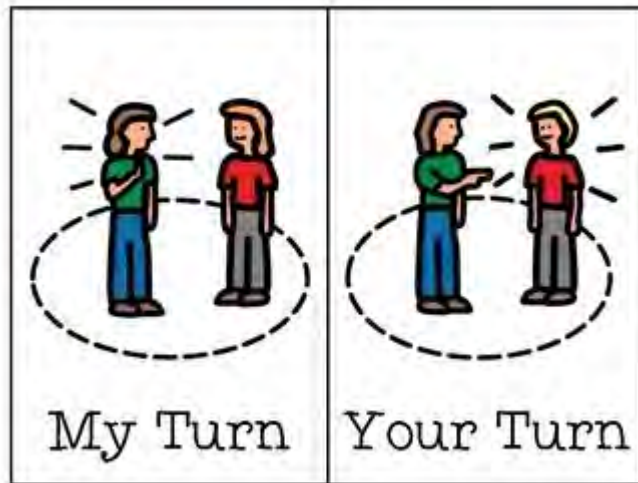

I can play with sand toys. I can keep the toys near the sand area.

I may want to play with all the toys, but I may need to share.

Sometimes, I need to share the sand toys. I need to take turns with the toys. Sharing and taking turns can be hard, but I can do it.

Playing with sand and the sand toys can be fun.

I can play with fish. I can walk on the floor with the pond.

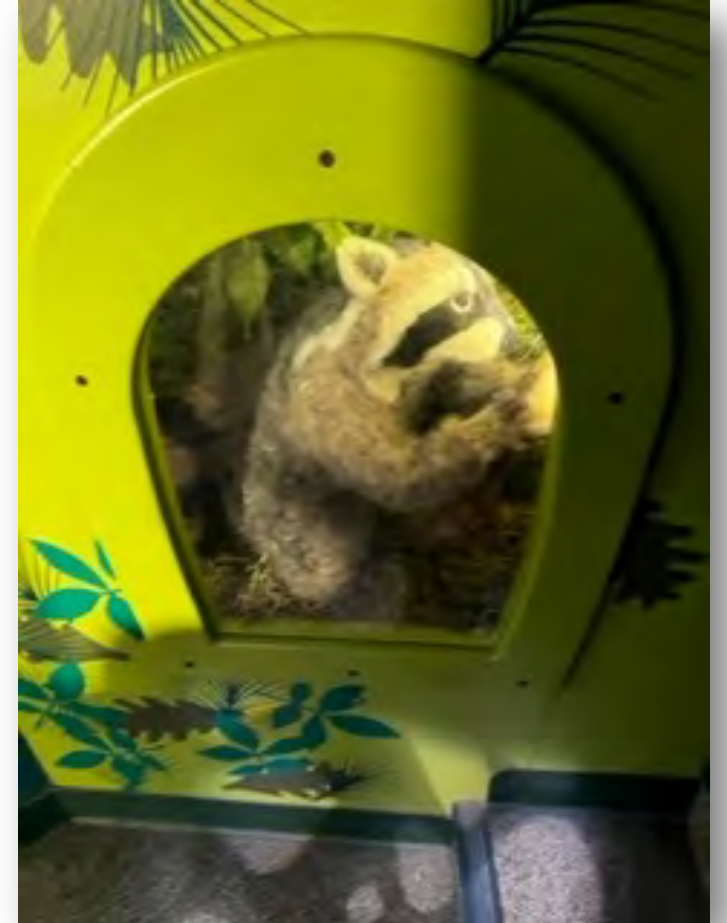

The pond looks different. The pond changes.
These changes can be fun.

I can play with balls. I can feel the ball's texture.

I can look in different windows. I can see different things.

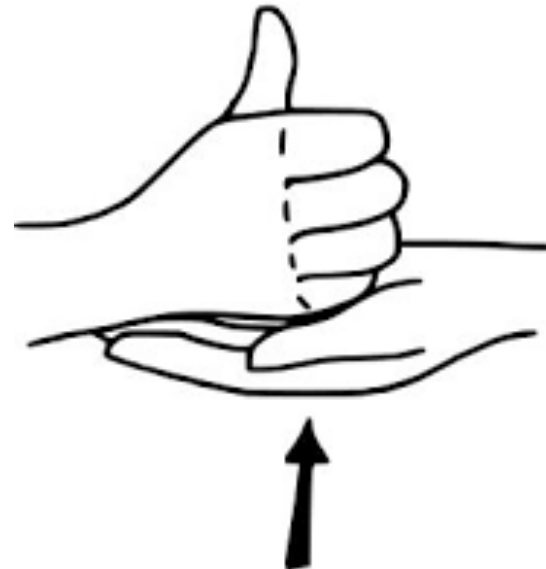

I can build things. I can build with blocks.
Building with blocks can be fun.

Sometimes, I may need help. My parent or Port Discovery Play Expert can help me.

Overview:

Scripted stories help children understand how to respond and interact in unfamiliar situations, activities or events. These stories are written to assist children in social situations. When children are more prepared and understand the expectations of a situation this helps to minimize possible problem behaviors that might occur. These stories can be utilized by teachers, parents and child care providers.

These stories are a tool to help a child prepare for a new situation and to address a challenging behavior within that new setting or situation. These scripted stories can be modified. Real photographs can be used instead of clip art. Please note that you can use real photographs of the child and change the wording to make it more personalized for your child or a student.
